Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act, (Act No. 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the draft annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the draft annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the draft annual financial statements and was given unrestricted access to all financial records and related data.

The draft annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The draft annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the draft annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2019 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality's operations depend on a number of sources of revenue ranging from National Government to its own sources and donations for continued funding of operations. The draft annual financial statements are prepared on the basis that the municipality is a going concern and that the Thembelihle Local Municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's draft annual financial statements. The draft annual financial statements have been examined by the municipality's external auditors.

The draft annual financial statements set out on pages 5 to 93, which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2018 and were signed on its behalf by:

Mr. MR Jack
Accounting Officer

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Officer's Report

The accounting officer submits his report for the year ended 30 June 2018.

1. Review of activities

Main business and operations

The municipality is engaged in provision of municipal services in terms of the municipal finance management act no.56 of 2003 and municipal systems act no.32 of 2000 and operates principally in South Africa.

The operating results and state of affairs of the municipality are fully set out in the attached financial statements and do not in our opinion require any further comment.

Net deficit of the municipality was R 2 481 943 (2017: surplus R 22 014 485).

Proportion of income and loss attributable to various classes of business:

2018

Classes of business	Proportion of contribution to income before tax	Other informative information
Property Rates	4 %	4 103 051
Service Charges	24 %	21 188 579
Grants and Subsidies	66 %	58 710 169
Other	6 %	4 845 693

2017

Classes of business	Proportion of contribution to income before tax	Amount
Property Rates	6 %	3 881 994
Service Charges	33 %	20 729 930
Grants and Subsidies	55 %	34 601 459
Other	6 %	3 975 935

2. Going concern

The draft annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.

The municipality still has power to levy rates and taxes and it will continue to receive funding from government as evident from the equitable share allocation in terms of the Division of Revenue Act of 2018.

3. Subsequent events

The accounting officer is not aware of any matter or circumstance arising since the end of the financial year.

4. Accounting Officer's interest in contracts

The accounting officer had no interest in contracts during the year.

5. Accounting policies

The draft annual financial statements have been prepared in accordance with the effective Standards of Generally Recognised Accounting Practices (GRAP), including any interpretations and directives issued by the Accounting Standards Board and in accordance with section 122 (3) of the Municipal Financial Management Act, (Act No. 56 of 2003).

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Officer's Report

6. Accounting Officer

The accounting officer of the municipality during the year and to the date of this report is as follows:

Name	Nationality	Changes
Mr. MR Jack	South Adrican	Appointed Thursday, 02 November 2017

7. Corporate governance

General

The accounting officer is committed to business integrity, transparency and professionalism in all its activities. As part of this commitment, the accounting officer supports the highest standards of corporate governance and the ongoing development of best practice.

The municipality confirms and acknowledges its responsibility to total compliance with the Code of Corporate Practices and Conduct ("the Code") laid out in the King Report on Corporate Governance for South Africa 2002. The accounting officer discuss the responsibilities of management in this respect, at Council meetings and monitor the municipality's compliance with the code on a three monthly basis.

The salient features of the municipality's adoption of the Code is outlined below:

Council

The Council:

- retains full control over the municipality, its plans and strategy;
- acknowledges its responsibilities as to strategy, compliance with internal policies, external laws and regulations, effective risk management and performance measurement, transparency and effective communication both internally and externally by the municipality;

Remuneration

The upper limits of the remuneration of the councillors, are determined in terms of the Government Notices issued by the Minister of Co-operative Governance and Traditional Affairs, as required by him by the Remunerations of Public Office Bearers Act No.20 of 1998.

Committee meetings

The accounting officer meets on a regular basis with the Mayor and Chairpersons of Portfolio Committees.

Portfolio Committee Chairpersons have access to all members of management (Section 57 Managers) of the municipality.

Internal audit

The municipality has a shared internal audit function based at the district municipality (as highlighted above). This is in compliance with the Municipal Finance Management Act, 2003.

8. Bankers

The municipality's primary banker is Standard Bank Limited.

The municipality also have accounts with ABSA Limited.

9. Auditors

Auditor General of South Africa will continue in office for the next financial period.

Accounting Policies

1. Presentation of Draft Annual Financial Statements

The draft annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No. 56 of 2003).

These draft annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these draft annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period, except for the changes set out in note 49 Changes in accounting policy.

These accounting policies are consistent with the previous period.

1.1 Presentation currency

These draft annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Going concern assumption

These draft annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Significant judgements and sources of estimation uncertainty

In preparing the draft annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the draft annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the draft annual financial statements. Significant judgements include:

Trade receivables

The calculation in respect of the impairment of trade receivables is based on an assessment of the extent to which debtors have defaulted on payments already due, and an assessment of their ability to make payments based on their creditworthiness. This was performed per trade receivable per service.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 21 - Provisions.

Useful lives of waste and water network and other assets

The municipality's management determines the estimated useful lives and related depreciation charges for the waste water and water networks. This estimate is based on industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty (continued)

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 19.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Cash & Cash Equivalents

Cash includes cash on hand (petty cash) and cash with banks (including call deposits). Cash equivalents are short term highly liquid investments that are readily convertible to a known amount of cash and are held with registered banking institutions with maturities of three months or less. They are subject to insignificant risk of changes in value.

For purposes of the cash flow statement, cash and cash equivalents comprise cash on hand and deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables. Bank overdrafts are recorded based on the facility used. Finance charges on bank overdrafts are expenses as incurred. Bank overdrafts are shown within borrowings in current liabilities on the Statement of Financial Position. Cash and cash equivalents and bank borrowings are subsequently recorded at amortised cost.

1.4 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.4 Investment property (continued)

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the entity determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the entity becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

Property interests held under operating leases are classified and accounted for as investment property in the following circumstances:

When classification is difficult, the criteria used to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of operations, including the nature or type of properties classified as held for strategic purposes, are as follows:

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the draft annual financial statements (see note 10).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the draft annual financial statements (see note 11).

1.5 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year.

The cost of an item of property, plant and equipment is recognised as an asset if, and only if,

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and if
- the cost or fair value of the item can be measured reliably.

Property, plant and equipment is initially measured at cost on its acquisition date or in the case of assets acquired by grants or donations, deemed cost, being the fair value of the asset on initial recognition.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.5 Property, plant and equipment (continued)

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life - Years
Land		
• Land	Not Applicable	
Buildings	Straight line	
• Improvements		10 - 30
Infrastructure	Straight line	
• Roads & Paving		5 - 80
• Electricity		5 - 50
• Water		10 - 100
• Sewerage/ Solid waste		10 - 60
• Water		10 - 100
Community	Straight line	
• Community Facilities		30
• Recreational facilities		15 - 30
Other	Straight line	
• Computer Equipment		5 - 10
• Emergency Equipment		10
• Furniture & Fittings		5 - 15
• Motor Vehicles		7 - 15
• Office Equipment		5 - 15
• Plant and Equipment		5 - 15

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.5 Property, plant and equipment (continued)

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements.

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements.

1.6 Site restoration and dismantling cost (Landfill sites)

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.7 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software, other	5 years

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.7 Intangible assets (continued)

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible assets is included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.8 Trade Payables

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method. Liabilities for annual leave (accrued leave pay) and annual bonus are recognised as they accrue to employees. Accrual is based on the potential liability of the municipality. Liabilities for goods and services rendered to the municipality before year end are accrued on management's estimate if the invoice or statement have not been issued.

1.9 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Derecognition is the removal of a previously recognised financial asset or financial liability from the entity's statement of financial position.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.9 Financial instruments (continued)

- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.9 Financial instruments (continued)

Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Cash and cash equivalents	Financial asset measured at amortised cost
Trade receivables	Financial asset measured at amortised cost

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Loans	Financial liability measured at amortised cost
Finance leases	Financial liability measured at amortised cost
Payables	Financial liability measured at amortised cost

Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.9 Financial instruments (continued)

Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the entity establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, an municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

Reclassification

The entity does not reclassify a financial instrument while it is issued or held unless it is:

- combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the entity reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the entity reclassifies the instrument from cost to fair value.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

The entity assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.9 Financial instruments (continued)

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly OR through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Distributions to holders of residual interests are recognised by the entity directly in net assets. Transaction costs incurred on residual interests are accounted for as a deduction from net assets.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity does not offset the transferred asset and the associated liability.

1.10 Unspent conditional grants

A government grant is recognised only when there is reasonable assurance that the entity will comply with any conditions attached to the grant and the grant will be received.

Where not all conditions relating to the conditional grant has been met, a portion of the grant is treated as unspent. In this case, the unspent portion is treated as deferred income.

1.11 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.11 Leases (continued)

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic interest rate on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.12 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.12 Inventories (continued)

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Water

The estimation of the water inventory in the reservoirs is based on the measurement of water via manual level meters, where the level indicates the depth of the water in the reservoir, which is then converted into volumes based on the total capacity of the relevant reservoir.

Water is regarded as inventory when the municipality purchased water in bulk with the intention to resell it to the consumer or to use it internally, or where the municipality has incurred purification costs on water obtained from natural resources (rain, rivers, springs, boreholes etc.) However, water in dams, that are filled by natural resources and that has not yet been treated, is under the control of the municipality but can not be measured reliably as there is no cost attached to the water, is not recognised in the statement of financial position.

The basis of determining the cost of water purchased and not yet sold at statement of financial position date comprises all costs of purchase, cost of conversion and other costs incurred in bringing the inventory to its present location, net of trade discounts and rebates.

Water and purified effluent are valued by using the last invoice amount per KL as received from the water supplier to determine the lowest of cost and net realisable value.

1.13 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Cost plus or cost based contract is a construction contract in which the contractor is reimbursed for allowable or otherwise defined costs and, in the case of a commercially-based contract, an additional percentage of these costs or a fixed fee, if any.

Where the outcome of a construction contract can be estimated reliably, contract revenue and costs are recognised by reference to the stage of completion of the contract activity at the reporting date, as measured by completion of a physical proportion of the contract work.

Treasury provides the Municipality with the Regional Bulk infrastructure grant. This Grant refunds the Municipality for expenses incurred on approved projects.

When it is probable that total contract costs will exceed total contract revenue, the expected deficit is recognised as an expense immediately.

1.14 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.14 Impairment of cash-generating assets (continued)

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

1.15 Share capital / contributed capital

An equity instrument is any contract that evidences a residual interest in the assets of an municipality after deducting all of its liabilities.

1.16 Employee benefits

Defined contribution plans

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the entity's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

Defined benefit plans

For defined benefit plans the cost of providing the benefits is determined using the projected credit method.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Consideration is given to any event that could impact the funds up to end of the reporting period where the interim valuation is performed at an earlier date.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight line basis over the average period until the amended benefits become vested.

To the extent that, at the beginning of the financial period, any cumulative unrecognised actuarial gain or loss exceeds ten percent of the greater of the present value of the projected benefit obligation and the fair value of the plan assets (the corridor), that portion is recognised in surplus or deficit over the expected average remaining service lives of participating employees. Actuarial gains or losses within the corridor are not recognised.

Gains or losses on the curtailment or settlement of a defined benefit plan is recognised when the entity is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces the fair value of plan assets.

Any asset is limited to unrecognised actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.17 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 50.

Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model, the related depreciation, based on the estimated useful life of the landfill site is recognised immediately in surplus or deficit.

If the related asset is measured using the revaluation model:

- changes in the liability alter the revaluation surplus or deficit previously recognised on that asset, so that:
 - a decrease in the liability is credited directly to revaluation surplus in net assets, except that it is recognised in surplus or deficit to the extent that it reverses a revaluation deficit on the asset that was previously recognised in surplus or deficit; and
 - an increase in the liability is recognised in surplus or deficit, except that it is debited directly to revaluation surplus in net assets to the extent of any credit balance existing in the revaluation surplus in respect of that asset;

1.18 Commitments

Items are classified as commitments when the municipality has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.18 Commitments (continued)

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancelable or only cancelable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity – therefore salary commitments relating to employment contracts or operational commitments are excluded.

1.19 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service charges relating to electricity, water and sanitation are based on consumption. Meters are read and billed on a monthly basis and revenue is accounted for when invoiced. Estimated consumption's are made monthly when meters have not been read. The estimates of consumption are accounted for as revenue when invoiced. Adjustments to estimates of consumption are made in the invoicing period when meters have been read. These adjustments are accounted for as revenue or as a write back of revenue in the invoicing period. Revenue from the sale of electricity pre-paid meter cards are recognised at the point of sale. An adjustment for an unutilised portion is made at year end based on the average consumption history.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.19 Revenue from exchange transactions (continued)

Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Income from agency services: Income from agency services are accounted for on a monthly basis once the income collected/retrieved on behalf of agents has been quantified. The income is accounted for in terms of the agency agreement.

1.20 Revenue from non-exchange transactions

Non-exchange transactions are defined as transactions where the entity receives value from another entity without directly giving approximately equal value in exchange.

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Government grants

Government grants are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality,
- the amount of the revenue can be measured reliably, and
- to the extent that there has been compliance with any restrictions associated with the grant.

The municipality assesses the degree of certainty attached to the flow of future economic benefits or service potential on the basis of the available evidence. Certain grants payable by one level of government to another are subject to the availability of funds. Revenue from these grants is only recognised when it is probable that the economic benefits or service potential associated with the transaction will flow to the entity. An announcement at the beginning of a financial year that grants may be available for qualifying entities in accordance with an agreed programme may not be sufficient evidence of the probability of the flow. Revenue is then only recognised once evidence of the probability of the flow becomes available.

Restrictions on government grants may result in such revenue being recognised on a time proportion basis. Where there is no restriction on the period, such revenue is recognised on receipt or when the Act becomes effective, whichever is earlier.

When government remit grants on a re-imbursement basis, revenue is recognised when the qualifying expense has been incurred and to the extent that any other restrictions have been complied with.

1.21 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.22 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.23 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.24 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.25 Irregular expenditure

Irregular expenditure as defined in section 1 of the PFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act; or
- (b) the State Tender Board Act, 1968 (Act No. 86 of 1968), or any regulations made in terms of the Act; or
- (c) any provincial legislation providing for procurement procedures in that provincial government.

National Treasury practice note no. 4 of 2008/2009 which was issued in terms of sections 76(1) to 76(4) of the PFMA requires the following (effective from 1 April 2008):

Irregular expenditure that was incurred and identified during the current financial year and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Accounting Policies

1.26 Budget information

Municipalities are typically subject to budgetary limits in the form of appropriations or budget authorisation's (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2017/07/01 to 2018/06/30.

The budget for the economic entity includes all the entities approved budgets under its control.

The draft annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

1.27 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the provincial sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its draft annual financial statements.

1.28 Accumulated surplus

Accumulated surplus is updated on a yearly basis with the net deficit or net loss, whichever is applicable for the financial period's results.

Thembelihle Local Municipality

Accounting Policies

1.29 Value Added Tax (VAT)

The municipality is registered with SARS for VAT on the payment basis, in accordance with Sec15(2)(a) of the Value-added Tax Act No 89 of 1991. VAT is accounted for on the accrual basis as required by GRAP on the transaction basis. At year end balances remain for deferred VAT Receivable and Payable as well as the Actual amount receivable or payable with SARS.

Notes to the Draft Annual Financial Statements

Figures in Rand	2018	2017
-----------------	------	------

2. New standards and interpretations

2.1 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2018 or later periods:

GRAP 34: Separate Financial Statements

The objective of this Standard is to prescribe the accounting and disclosure requirements for investments in controlled entities, joint ventures and associates when an entity prepares separate financial statements.

It furthermore covers Definitions, Preparation of separate financial statements, Disclosure, Transitional provisions and Effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister sets the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's draft annual financial statements.

GRAP 35: Consolidated Financial Statements

The objective of this Standard is to establish principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities.

To meet this objective, the Standard:

- requires an entity (the controlling entity) that controls one or more other entities (controlled entities) to present consolidated financial statements;
- defines the principle of control, and establishes control as the basis for consolidation;
- sets out how to apply the principle of control to identify whether an entity controls another entity and therefore must consolidate that entity;
- sets out the accounting requirements for the preparation of consolidated financial statements; and
- defines an investment entity and sets out an exception to consolidating particular controlled entities of an investment entity.

It furthermore covers Definitions, Control, Accounting requirements, Investment entities: Fair value requirement, Transitional provisions and Effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister sets the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's draft annual financial statements.

GRAP 36: Investments in Associates and Joint Ventures

The objective of this Standard is to prescribe the accounting for investments in associates and joint ventures and to set out the requirements for the application of the equity method when accounting for investments in associates and joint ventures.

It furthermore covers Definitions, Significant influence, Equity method, Application of the equity method, Separate financial statements, Transitional provisions and Effective date.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

2. New standards and interpretations (continued)

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister sets the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's draft annual financial statements.

GRAP 37: Joint Arrangements

The objective of this Standard is to establish principles for financial reporting by entities that have an interest in arrangements that are controlled jointly (i.e. joint arrangements).

To meet this objective, the Standard defines joint control and requires an entity that is a party to a joint arrangement to determine the type of joint arrangement in which it is involved by assessing its rights and obligations and to account for those rights and obligations in accordance with that type of joint arrangement.

It furthermore covers Definitions, Joint arrangements, Financial statements and parties to a joint arrangement, Separate financial statements, Transitional provisions and Effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister sets the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's draft annual financial statements.

GRAP 38: Disclosure of Interests in Other Entities

The objective of this Standard is to require an entity to disclose information that enables users of its financial statements to evaluate:

- the nature of, and risks associated with, its interests in controlled entities, unconsolidated controlled entities, joint arrangements and associates, and structured entities that are not consolidated; and
- the effects of those interests on its financial position, financial performance and cash flows.

It furthermore covers Definitions, Disclosing information about interests in other entities, Significant judgements and assumptions, Investment entity status, Interests in controlled entities, Interests in joint arrangements and associates, Interests in structured entities that are not consolidated, Non-qualitative ownership interests, Controlling interests acquired with the intention of disposal, Transitional provisions and Effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister sets the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's draft annual financial statements.

Guideline: Accounting for Arrangements Undertaken i.t.o the National Housing Programme

The objective of this guideline: Entities in the public sector are frequently involved in the construction of houses as part of government's housing policy, implemented through the national housing programme, which is aimed at developing sustainable human settlements. The Housing Act, Act No. 107 of 1997 provides information about the housing programmes that fall within the scope of the national housing programme. Concerns were raised by preparers about the inconsistent accounting applied to housing arrangements undertaken by entities under the national housing programme. Different accounting may be appropriate where there are differences between the terms and conditions of arrangements concluded by entities. However, under housing arrangements that are undertaken in terms of the national housing programme, there are common features and issues that need to be considered. As a result, the Board agreed to develop high-level guidance for arrangements undertaken in terms of the national housing programme.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

2. New standards and interpretations (continued)

It covers: Background to arrangements undertaken in terms of the national housing programme, Transactions that affect the accounting of housing arrangements, Consider whether the municipality undertakes transactions with third parties on behalf of another party, Accounting by municipalities appointed as project manager, Disclosure requirements, Accounting by municipalities appointed as project developer, Accounting for the accreditation fee, commission, administration or transaction fee received, Land and infrastructure, Conclusion and Application of this Guideline to existing arrangements.

The effective date of the guideline is not yet set by the Minister of Finance.

The municipality expects to adopt the guideline for the first time when the Minister sets the effective date for the guideline.

It is unlikely that the guideline will have a material impact on the municipality's draft annual financial statements.

GRAP 110: Living and Non-living Resources

The objective of this Standard is to prescribe the:

- recognition, measurement, presentation and disclosure requirements for living resources; and
- disclosure requirements for non-living resources

It furthermore covers Definitions, Recognition, Measurement, Depreciation, Impairment, Compensation for impairment, Transfers, Derecognition, Disclosure, Transitional provisions and Effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister sets the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's draft annual financial statements.

GRAP 20: Related parties

The objective of this standard is to ensure that a reporting entity's draft annual financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

An entity that prepares and presents financial statements under the accrual basis of accounting (in this standard referred to as the reporting entity) shall apply this standard in:

- identifying related party relationships and transactions;
- identifying outstanding balances, including commitments, between an entity and its related parties;
- identifying the circumstances in which disclosure of the items in (a) and (b) is required; and
- determining the disclosures to be made about those items.

This standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This standard also applies to individual draft annual financial statements.

Disclosure of related party transactions, outstanding balances, including commitments, and relationships with related parties may affect users' assessments of the financial position and performance of the reporting entity and its ability to deliver agreed services, including assessments of the risks and opportunities facing the entity. This disclosure also ensures that the reporting entity is transparent about its dealings with related parties.

The standard states that a related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to the reporting entity if that person:
 - has control or joint control over the reporting entity;
 - has significant influence over the reporting entity;
 - is a member of the management of the entity or its controlling entity.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

2. New standards and interpretations (continued)

- An entity is related to the reporting entity if any of the following conditions apply:
 - the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others);
 - one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member);
 - both entities are joint ventures of the same third party;
 - one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
 - the entity is a post-employment benefit plan for the benefit of employees of either the entity or an entity related to the entity. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity;
 - the entity is controlled or jointly controlled by a person identified in (a); and
 - a person identified in (a)(i) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

The standard furthermore states that related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

The standard elaborates on the definitions and identification of:

- Close member of the family of a person;
- Management;
- Related parties;
- Remuneration; and
- Significant influence

The standard sets out the requirements, inter alia, for the disclosure of:

- Control;
- Related party transactions; and
- Remuneration of management

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister sets the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's draft annual financial statements.

GRAP 32: Service Concession Arrangements: Grantor

The objective of this Standard is: to prescribe the accounting for service concession arrangements by the grantor, a public sector entity.

It furthermore covers: Definitions, recognition and measurement of a service concession asset, recognition and measurement of liabilities, other liabilities, contingent liabilities, and contingent assets, other revenues, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister sets the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's draft annual financial statements.

GRAP 108: Statutory Receivables

The objective of this Standard is: to prescribe accounting requirements for the recognition, measurement, presentation and disclosure of statutory receivables.

It furthermore covers: Definitions, recognition, derecognition, measurement, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister sets the effective date for the standard.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

2. New standards and interpretations (continued)

It is unlikely that the standard will have a material impact on the municipality's draft annual financial statements.

IGRAP 17: Service Concession Arrangements where a Grantor Controls a Significant Residual Interest in an Asset

This Interpretation of the Standards of GRAP provides guidance to the grantor where it has entered into a service concession arrangement, but only controls, through ownership, beneficial entitlement or otherwise, a significant residual interest in a service concession asset at the end of the arrangement, where the arrangement does not constitute a lease. This Interpretation of the Standards of GRAP shall not be applied by analogy to other types of transactions or arrangements.

A service concession arrangement is a contractual arrangement between a grantor and an operator in which the operator uses the service concession asset to provide a mandated function on behalf of the grantor for a specified period of time. The operator is compensated for its services over the period of the service concession arrangement, either through payments, or through receiving a right to earn revenue from third party users of the service concession asset, or the operator is given access to another revenue-generating asset of the grantor for its use.

Before the grantor can recognise a service concession asset in accordance with the Standard of GRAP on Service Concession Arrangements: Grantor, both the criteria as noted in paragraph .01 of this Interpretation of the Standards of GRAP need to be met. In some service concession arrangements, the grantor only controls the residual interest in the service concession asset at the end of the arrangement, and can therefore not recognise the service concession asset in terms of the Standard of GRAP on Service Concession Arrangements: Grantor.

A consensus is reached, in this Interpretation of the Standards of GRAP, on the recognition of the performance obligation and the right to receive a significant interest in a service concession asset.

The effective date of the interpretation is not yet set by the Minister of Finance.

The municipality expects to adopt the interpretation for the first time when the Minister sets the effective date for the interpretation.

It is unlikely that the interpretation will have a material impact on the municipality's draft annual financial statements.

IGRAP 18: Interpretation of the Standard of GRAP on Recognition and Derecognition of Land

This Interpretation of the Standards of GRAP applies to the initial recognition and derecognition of land in an entity's financial statements. It also considers joint control of land by more than one entity.

When an entity concludes that it controls the land after applying the principles in this Interpretation of the Standards of GRAP, it applies the applicable Standard of GRAP, i.e. the Standard of GRAP on Inventories, Investment Property (GRAP 16), Property, Plant and Equipment (GRAP 17) or Heritage Assets. As this Interpretation of the Standards of GRAP does not apply to the classification, initial and subsequent measurement, presentation and disclosure requirements of land, the entity applies the applicable Standard of GRAP to account for the land once control of the land has been determined. An entity also applies the applicable Standards of GRAP to the derecognition of land when it concludes that it does not control the land after applying the principles in this Interpretation of the Standards of GRAP.

In accordance with the principles in the Standards of GRAP, buildings and other structures on the land are accounted for separately. These assets are accounted for separately as the future economic benefits or service potential embodied in the land differs from those included in buildings and other structures. The recognition and derecognition of buildings and other structures are not addressed in this Interpretation of the Standards of GRAP.

The effective date of the interpretation is for years beginning on or after 01 April 2019.

The municipality expects to adopt the interpretation for the first time in the 2020 draft annual financial statements.

It is unlikely that the interpretation will have a material impact on the municipality's draft annual financial statements.

IGRAP 19: Liabilities to Pay Levies

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

2. New standards and interpretations (continued)

This Interpretation of the Standards of GRAP provides guidance on the accounting for levies in the financial statements of the entity that is paying the levy. It clarifies when entities need to recognise a liability to pay a levy that is accounted for in accordance with GRAP 19.

To clarify the accounting for a liability to pay a levy, this Interpretation of the Standards of GRAP addresses the following issues:

- What is the obligating event that gives rise to the recognition of a liability to pay a levy?
- Does economic compulsion to continue to operate in a future period create a constructive obligation to pay a levy that will be triggered by operating in that future period?
- Does the going concern assumption imply that an entity has a present obligation to pay a levy that will be triggered by operating in a future period?
- Does the recognition of a liability to pay a levy arise at a point in time or does it, in some circumstances, arise progressively over time?
- What is the obligating event that gives rise to the recognition of a liability to pay a levy that is triggered if a minimum threshold is reached?

Consensus reached in this interpretation:

- The obligating event that gives rise to a liability to pay a levy is the activity that triggers the payment of the levy, as identified by the legislation;
- An entity does not have a constructive obligation to pay a levy that will be triggered by operating in a future period as a result of the entity being economically compelled to continue to operate in that future period;
- The preparation of financial statements under the going concern assumption does not imply that an entity has a present obligation to pay a levy that will be triggered by operating in a future period;
- The liability to pay a levy is recognised progressively if the obligating event occurs over a period of time;
- If an obligation to pay a levy is triggered when a minimum threshold is reached, the accounting for the liability that arises from that obligation shall be consistent with the principles established in this Interpretation of the Standards of GRAP; and
- An entity shall recognise an asset, in accordance with the relevant Standard of GRAP, if it has prepaid a levy but does not yet have a present obligation to pay that levy.

The effective date of the interpretation is not yet set by the Minister of Finance.

The municipality expects to adopt the interpretation for the first time when the Minister sets the effective date for the interpretation.

It is unlikely that the interpretation will have a material impact on the municipality's draft annual financial statements.

GRAP 12 (as amended 2016): Inventories

Amendments to the Standard of GRAP on Inventories resulted from inconsistencies in measurement requirements in GRAP 23 and other asset-related Standards of GRAP in relation to the treatment of transaction costs. Other changes resulted from changes made to IPSAS 12 on Inventories (IPSAS 12) as a result of the IPSASB's Improvements to IPSASs 2015 issued in March 2016.

The most significant changes to the Standard are:

- General improvements: To clarify the treatment of transaction costs and other costs incurred on assets acquired in non-exchange transactions to be in line with the principle in GRAP 23 (paragraph .12)
- IPSASB amendments: To align terminology in GRAP 12 with that in IPSAS 12. The term "ammunition" in IPSAS 12 was replaced with the term "military inventories" and provides a description of what it comprises in accordance with Government Finance Statistics terminology

The effective date of the amendment is for years beginning on or after 01 April 2018.

The municipality expects to adopt the amendment for the first time in the 2019 draft annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's draft annual financial statements.

GRAP 16 (as amended 2016): Investment Property

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

2. New standards and interpretations (continued)

Amendments to the Standard of GRAP on Investment Property resulted from editorial changes to the original text and inconsistencies in measurement requirements in GRAP 23 and other asset-related Standards of GRAP in relation to the treatment of transaction costs. Other changes resulted from changes made to IAS 40 on Investment Property (IAS 40) as a result of the IASB's amendments on Annual Improvements to IFRSs 2011 – 2013 Cycle issued in December 2013.

The most significant changes to the Standard are:

- General improvements: To clarify the treatment of transaction costs and other costs incurred on assets acquired in non-exchange transactions to be in line with the principle in GRAP 23 (paragraph .12); and To clarify the measurement principle when assets may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets.
- IASB amendments: To clarify the interrelationship between the Standards of GRAP on Transfer of Functions Between Entities Not Under Common Control and Investment Property when classifying investment property or owner-occupied property.

The effective date of the amendment is for years beginning on or after 01 April 2018.

The municipality expects to adopt the amendment for the first time in the 2019 draft annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's draft annual financial statements.

GRAP 17 (as amended 2016): Property, Plant and Equipment

Amendments to the Standard of GRAP on Property, Plant and Equipment resulted from editorial changes to the original text and inconsistencies in measurement requirements in GRAP 23 and other asset-related Standards of GRAP in relation to the treatment of transaction costs. Other changes resulted from changes made to IPSAS 17 on Property, Plant and Equipment (IPSAS 17) as a result of the IPSASB's Improvements to IPSASs 2014 issued in January 2015 and Improvements to IPSASs 2015 issued in March 2016.

The most significant changes to the Standard are:

- General improvements: To clarify the treatment of transaction costs and other costs incurred on assets acquired in non-exchange transactions to be in line with the principle in GRAP 23 (paragraph .12); and To clarify the measurement principle when assets may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets.
- IPSASB amendments: To clarify the revaluation methodology of the carrying amount and accumulated depreciation when an item of property, plant, and equipment is revalued; To clarify acceptable methods of depreciating assets; To align terminology in GRAP 17 with that in IPSAS 17. The term "specialist military equipment" in IPSAS 17 was replaced with the term "weapon systems" and provides a description of what it comprises in accordance with Government Finance Statistics terminology; and To define a bearer plant and include bearer plants within the scope of GRAP 17, while the produce growing on bearer plants will remain within the scope of GRAP 27.

The effective date of the amendment is for years beginning on or after 01 April 2018.

The municipality expects to adopt the amendment for the first time in the 2019 draft annual financial statements.

GRAP 31 (as amended 2016): Intangible Assets

Amendments to the Standard of GRAP on Intangible Assets resulted from inconsistencies in measurement requirements in GRAP 23 and other asset-related Standards of GRAP in relation to the treatment of transaction costs. Other changes resulted from changes made to IPSAS 31 on Intangible Assets (IPSAS 31) as a result of the IPSASB's Improvements to IPSASs 2014 issued in January 2015.

The most significant changes to the Standard are:

- General improvements: To add the treatment of transaction costs and other costs incurred on assets acquired in non-exchange transactions to be in line with the principle in GRAP 23 (paragraph .12); and To clarify the measurement principle when assets may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

2. New standards and interpretations (continued)

- IPSASB amendments: To clarify the revaluation methodology of the carrying amount and accumulated depreciation when an item of intangible assets is revalued; and To clarify acceptable methods of depreciating assets

The effective date of the amendment is for years beginning on or after 01 April 2018.

The municipality expects to adopt the amendment for the first time in the 2019 draft annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's draft annual financial statements.

GRAP 103 (as amended 2016): Heritage Assets

Amendments to the Standard of GRAP on Heritage Assets resulted from inconsistencies in measurement requirements in GRAP 23 and other asset-related Standards of GRAP in relation to the treatment of transaction costs. Other changes resulted from editorial changes to the original text.

The most significant changes to the Standard are:

- General improvements: To clarify the treatment of transaction costs and other costs incurred on assets acquired in non-exchange transactions to be in line with the principle in GRAP 23 (paragraph .12); and To clarify the measurement principle when assets may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets

The effective date of the amendment is for years beginning on or after 01 April 2018.

The municipality expects to adopt the amendment for the first time in the 2019 draft annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's draft annual financial statements.

-----------------------------------	-----------	-----------

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Details of valuation

The effective date of the revaluations was 30 June 2018. The method used by the valuator was to use the existing valuation roll as prepared by the municipal valuer. The value per the valuation roll was increased or decreased to be calculated the current marked value from analysis of most recent property sales dating from 2009 to current.

The assumptions made were to use the marked related property information over the last 6 years to increase or decrease the property value to get to a fair value at the end of the financial year under review.

The fair value of Investment Property was provided by Pierre Rynners, registered as a Professional Associated Valuer under subsection (2) of Section 22 of (Act 47) of 2000 of the Property Valuers Profession Bill.

13. Non-current receivables from exchange transactions

Thembelihle Municipality provides two settlement options to Consumer debtors to settle their outstanding service accounts, **Option 1:** 25% of the outstanding balance is paid over 3 years. Once the 25% is settled the remaining 75% of the outstanding account are written off.

Option 2: 60% of the outstanding balance is paid once-off and the remaining 40% of the outstanding balance is written off.

The balance of R437 322 (2017: R460 734), after provision for impairments of R3 865 064 (2017: R2 259 097), reflect the Non-Current portion payable under Option1. The Amount written off under Option 1 and 2 totals R320 769 (2017: R362 012).

Non-current liabilities	2 611 373	253 433
Current liabilities	806 618	261 013
	3 417 991	514 446

It is municipality policy to lease certain office equipment under finance leases.

The average lease term was 3 years and the prime interest rate was 10% (2017: 11%).

Interest rates are fixed at the contract date. Certain leases have fixed repayments and no arrangements have been entered into for contingent rent.

The municipality's obligations under finance leases are secured by the lessor's charge over the leased assets. Refer note 11.

16. Payables from exchange transactions

Trade payables	72 725 843	62 026 315
Payments received in advanced	211 788	287 551

18. Consumer deposits		
Water and electricity	590 054	563 765
19. Employee benefit obligations		
Defined benefit plan		
The plan is a post employment medical benefit plan.		
Post retirement medical aid plan		
The municipality operates a funded post employment health care defined benefit plan for qualifying employees. Employees of the municipality are members of LA Health, Hosmed, Bonitas and SAMWUMED medical aid schemes.		
The municipality is committed to pay 70% of the members post employment medical aid contributions. All subsidies are subject to a maximum of R4 218 for the year ending 30 June 2018. Under the plan, dependants of the former employees are entitled to continued membership of their medical aid scheme upon the death of the primary member. No other post-employment benefits are provided to these employees. As at the end of the financial period, the members of the medical aid entitled to the post employment medical scheme subsidy were 34 in-service members and 6 pensioners.		
The most recent actuarial valuation of the plan assets and the present value of the defined obligations were carried out at 30 June 2018 by ARCH Actuarial Consulting. The present value of the defined benefit obligation, and the related current service cost and past service costs, were measured using the Projected Unit Credit Method.		
The amounts recognised in the statement of financial position are as follows:		
Carrying value		
Present value of the defined benefit obligation - In-service members	2 327 257	2 047 516
Present value of the defined benefit obligation - Continuation members	2 650 040	3 184 968
	4 977 297	5 232 484
Non-current liabilities	(4 742 456)	(4 978 094)
Current liabilities	(234 840)	(254 390)
	(4 977 296)	(5 232 484)
The municipality does not have assets set aside for post-employment medical aid funding that qualify as plan assets in terms of the requirements of GRAP 25		
Changes in the present value of the defined benefit obligation are as follows:		
Opening balance	5 232 484	4 800 374
Vested benefits	(254 390)	(217 968)
Actuarial (gain) / loss	(692 364)	(34 661)
Net expense recognised in the statement of financial performance	691 566	684 739
	4 977 296	5 232 484
Net expense recognised in the statement of financial performance		
Current service cost	211 007	248 401
Interest cost	480 559	436 338
	691 566	684 739
Calculation of actuarial gains and losses		
Actuarial (gains) losses – Obligation	692 364	34 661

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

Figures in Rand	2018	2017
-----------------	------	------

19. Employee benefit obligations (continued)

Key assumptions used

Assumptions used at the reporting date:

Discount rates used	9.45 %	9.41 %
Medical cost trend rates	1.98 %	1.57 %
Expected increase in healthcare costs	7.32 %	7.71 %
Future changes in maximum state healthcare benefits	5.12 %	5.41 %

Replacement Ratio: This is the expected pension as a percentage of final salary, at retirement. This assumption is required to determine the income band at retirement of members since some contribution rate tables are income-dependent. A replacement ratio of 65% was assumed. Income bands are assumed to increase with general salary inflation and therefore an explicit salary inflation assumption is not necessary.

Decrement Assumptions: Mortality [Active members: SA(85-90), Pensioners: PA(90)]

Average retirement age: The normal retirement age of employees is 65. It has been assumed that in-service members will retire at age 63, which then implicitly allows for expected rates of early and ill-health retirement.

Continuation of Membership: It has been assumed that 100% of in-service members will remain on the Municipality's health care arrangement should they stay until retirement.

Family profile: It has been assumed that husbands will be five years older than their wives. Further, we've assumed that 95% of eligible employees on a health care arrangement at retirement will have an adult dependant. For current retiree members, actual marital status was used and the potential for remarriage was ignored.

Other assumptions - Sensitivity Analysis

Assumed healthcare cost trends rates have a significant effect on the amounts recognised in surplus or deficit. A one percentage point change in assumed healthcare cost trends, Discount rate and Post retirement mortality will have the following effects:

	One percentage point increase	One percentage point decrease
Effect on defined benefit obligation	5 380 000	5 632 000

Amounts for the current and previous three years are as follows:

	R	R	R
Defined benefit obligation	4 977 297	5 232 485	3 769 000

Defined contribution plan

It is the policy of the municipality to provide retirement benefits to all its employees. A number of defined contribution provident funds, all of which are subject to the Pensions Fund Act and some are multi-employer exist for this purpose.

The municipality is under no obligation to cover any unfunded benefits.

Included in defined contribution plan information above, is the following plans which are Multi-Employer Funds and are Defined Benefit Plans, but due to the fact that sufficient information is not available to enable the municipality to account for the plans as defined benefit plans. The municipality accounted for these plans as a defined contribution plans:

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

Figures in Rand	2018	2017
-----------------	------	------

21. Provisions

Reconciliation of provisions - 2018

	Opening Balance	Additions	Total
Environmental rehabilitation	7 803 417	469 014	8 272 431

Reconciliation of provisions - 2017

	Opening Balance	Reduction due to re- measurement or settlement without cost to entity	Total
Environmental rehabilitation	7 844 900	(41 483)	7 803 417

Environmental rehabilitation provision

Council operates two disposal sites. In terms of the Environmental Conservation Act (Act No 73 of 1989), the municipality is responsible to perform a rehabilitation of the land upon closure of the landfill site.

The Municipality has reported that both sites are licensed for operations. As disclosed in the Government Gazette no 10747 dated 24 July 2015, the maximum fine applicable for operating a waste disposal site under section 24G Fine Regulations of NEMA, rounds up to R10 million per site and a contingent liability has been disclosed.

Section 24G (1) of the NEMA also stipulates that the landfill site be closed with immediate effect if no objection has been made by the municipality, therefore the provision for rehabilitation has been calculated as a current liability at 30 June 2018.

The calculation was based on cost to close and rehabilitate the site within 12 months after 30 June 2018. As the closure date is estimated to be at year end, no discount rates were applied.

There is a new site under development at Hopetown at 30 June 2018, but is still in the process of being licensed and has not been used for disposal to date, therefore its rehabilitation provision will be added in the future, but cannot during this year's assessment due to no obligation to rehabilitate yet.

Summary of assumptions made for valuation purpose:

- Disposal rate at the sites less than 25 tonnes per day based on population statistics.
- Capping design based on DWS comments and/or recently issued closure licences in other Municipalities since no closure licences or designs have been issued for the Thembelihle Local Municipality.
- Sufficient quantities of capping material in the proportions as described in section 3.1 of independent valuation report are available from on-site and nearby sources and the rest are to be imported from commercial sources also as described under section 3.1. of the independent valuation report.
- The sites under consideration will be closed and replaced by the new Hopetown Landfill which is in development.
- Clay was replaced by GCL in the design estimate due to the unlikely availability of sufficient quality clay from on-site sources.

22. Third Party collections

The Liability is due to collections on behalf of the Department of safety on which the Municipality earns a 12% commission. During previous financial periods the balances, 88% of the collections, were not paid over to the Department of safety. The balance payable to the Department of safety due to these non-payments is R130 643 (2017: R521 776)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

Figures in Rand

2018

2017

23. Long Service awards

The Municipality offers employees long service awards for every five years of service completed, from ten years of service to 45 years of service, inclusive.

Opening Balance	1 206 868
Current-service cost	132 509
Interest cost	93 673
Actuarial (Gain)/Loss	-90 496
Employee Benefit vesting's	-66 488
Closing Balance	1 276 066
Current Portion	48 572
Non-Current Portion	1 227 494

Key Financial Assumptions:

Discount rate:	8.66% p.a
General Salary Inflation:	6.24% p.a
Net effective discount rate:	2.28% p.a

The discount rate used is derived by using a liability-weighted average of the yields corresponding to the average term until payment of long service awards, for each employee. The corresponding liability weighted index-linked yield is 2.77%. These rates do not reflect any adjustment for taxation. These rates were deduced from the yield curve obtained from the Johannesburg Stock Exchange after the market close on 30 June 2018.

Salary inflation rate: This assumption is required to reflect the estimated growth in salaries of the eligible employees until retirement. It is important in that the LSA are based on an employee's salary at the date of the award. The assumption is traditionally split into two components, namely General Salary Inflation and Promotional Salary Escalation. The latter is considered under demographic assumptions.

General Salary Inflation: This assumption is more stable relative to the growth in Consumer Price Index (CPI) than in absolute terms. In most industries, experience has shown, that over the long-term, salary inflation is between 1.0% and 1.5% above CPI inflation.

The expected inflation assumption of 5.24% was obtained from the differential between market yields on index-linked bonds (2.77%) consistent with the estimated terms of the liabilities and those of nominal bonds (8.66%) with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0.50%). Therefore, expected inflation is determined as $((1+8.66\%-0.50\%)/(1+2.77\%))-1$

Thus, a general salary inflation rate of 6.24% per annum over the expected term of the liability has been assumed, which is 1.00% higher than the estimate of CPI inflation over the same term. This assumption reflects a net discount rate of 2.28%.

It has been assumed that the next salary increase will take place on 1 July 2019.

Key Demographic assumptions:

Average retirement age:	63 years
Mortality during employment:	SA 85-90

Withdrawal from service (Sample annual rates)	Age	Rate Female	Rate Male
	20	24%	16%
	30	15%	10%
	40	6%	6%
	50	2%	2%
	55	1%	1%

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

Figures in Rand

2018

2017

23. Long Service awards (continued)

Demographic assumptions are required about the future characteristics of current employees who are eligible for LSA.

Promotional Salary Scale: The annual inflation rates below are in addition to the General Salary Inflation assumption of 6.30% per annum for all employees.

Promotional salary scale

Age band	Additional promotional scale
20 – 24	5.0%
25 – 29	4.0%
30 – 34	3.0%
35 – 39	2.0%
40 – 44	1.0%
> 45	0.0%

Pre-retirement Mortality:

SA85-90 ultimate table, adjusted down for female lives.

Average Retirement Age:

The normal retirement age is 65. It has been assumed that employees will retire at age 63 on average, which implicitly makes an allowance for expected rates of early and ill-health retirement.

Withdrawal from Service: If an in-service member leaves, the employer's liability in respect of that member ceases. It is therefore important not to overstate withdrawal rates. A sample of the assumed rates is set out below.

Sample withdrawal rates

Age	Females	Males
20	24%	16%
25	18%	12%
30	15%	10%
35	10%	8%
40	6%	6%
45	4%	4%
50	2%	2%
55	1%	1%
>55	0%	0%

The liability at the Valuation Date was recalculated to show the effect of:

- (i) A 1% increase and decrease in the assumed general salary inflation rate;
- (ii) A 1% increase and decrease in the discount rate;
- (iii) A two-year decrease and increase in the assumed average retirement age of employees; and
- (iv) A 50% decrease in the assumed withdrawal rates from service.

Sensitivity Analysis on the Unfunded Accrued Liability (in R Millions)

Assumption	Change	Liability	% change
Central assumptions		1.276	
General salary inflation	+1%	1.365	7%
	-1%	1.195	-6%
Discount Rate	+1%	1.191	-7%
	-1%	1.371	7%
Average retirement age	-2 yrs	1.158	-9%
	+2 yrs	1.352	6%
Withdrawal rates	-50%	1.510	18%

The table above indicates, for example, that if salary inflation is 1% greater than the long-term assumption made, the liability will be 7% higher than the results shown.

32. Property rates

Rates received

Residential	4 309 925	4 085 371
Less: Income forgone	(206 874)	(203 377)
	4 103 051	3 881 994

Property Rates are levied on the value of land and improvements, which valuation is performed every four years. During the financial period ended 30 June 2017 a new valuation roll was compiled which came into effect in July 2018

Interim valuations are processed on a continuous basis taking into account changes in individual property values due to alterations and subdivisions. During the 2017/18 financial period there were some alterations and subdivisions which were noted, these changes in individual property values were processed correctly in the current 2017/18 financial period.

Rates are levied monthly on property owners and are payable at the end of each month. Interest is levied at a rate determined by council on outstanding rates amounts.

Valuations

Residential	197 277 600	211 748 600
Commercial	82 063 800	93 429 600
State	80 123 700	89 042 700
Small holdings and farms	2 882 138 100	2 998 540 100
	3 241 603 200	3 392 761 000

Valuations on land and buildings are performed every 4 years. The last general valuation came into effect on 1 July 2015. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

Rates are levied on an annual basis with the final date for payment being 30 September 2018 (30 September 2017). Interest at prime plus 1% per annum (2017: 11.5%).

The new general valuation was implemented on 01 July 2015.

33. Government grants and subsidies

Operating grants

Equitable share	20 907 000	19 108 001
Finance Management Grant (FMG)	2 345 000	2 010 000
Water Sanitation Infrastructure Grant (WSIG)	4 000 000	-
Expanded Public Works Programme (EPWP)	996 680	991 701
Library Grant	1 012 228	813 562
LG SETA Grant	24 505	26 147
Treasury's contribution towards Audit Fees	13 169 399	3 323 746
	42 454 812	26 273 157

Capital grants

Municipal Infrastructure Grant (MIG)	8 255 357	8 053 643
Integrated National Electricity Programme (INEP)	8 000 000	-
Regional Bulk Infrastructure Grant (RBIG)	-	274 659
	16 255 357	8 328 302
	58 710 169	34 601 459

Conditional and Unconditional

Included in above are the following grants and subsidies received:

Conditional grants received	20 907 000	19 108 001
Unconditional grants received	24 633 770	15 493 458
	45 540 770	34 601 459

Equitable Share

In terms of the Constitution, this grant is used to subsidise the provision of basic services to indigent community members. In terms of the allocation made by DPLG the funds are also utilised to enable the municipality to execute its functions as a local municipality.

All registered indigents receive a monthly subsidy of R 140 (2017: R 140), which is funded from the grant.

Municipal Infrastructure Grant (MIG)

Balance unspent at beginning of year	89 357	-
Current-year receipts	8 166 000	8 143 000
Conditions met - transferred to revenue	(8 255 357)	(8 053 643)
	-	89 357

The Municipal Infrastructure Grant (MIG) was allocated for the construction of Highmast lights, sewer and water purification infrastructure as part of the upgrading of previously disadvantaged areas.

An amount of R 0 (2017: R 0) was withheld from the allocated Equitable share as a refund of unspent MIG funds from previous financial periods.

All current year allocations were fully spent during the year and allocated to revenue under votes.

Library Grant

Balance unspent at beginning of year	1 669 163	1 544 725
Current-year receipts	602 000	938 000
Conditions met - transferred to revenue	(1 012 228)	(813 562)

33. Government grants and subsidies (continued)

1 258 935	1 669 163
------------------	------------------

Conditions still to be met - remaining liabilities (see note 20).

The grant was as part of a contribution towards the running of libraries i.e to cover operational costs.

Expanded Public Works Programme (EPWP)

Balance unspent at beginning of year	8 299	-
Current-year receipts	1 000 000	1 000 000
Conditions met - transferred to revenue	(996 680)	(991 701)
	11 619	8 299

Conditions still to be met - remaining liabilities (see note 20).

The grants was received for the purpose of creating job opportunities. There were funds that have been withheld from equitable share in the current year relating to closing balances of EPWP grant in 2016/17 Therefore own funds were used by the municipality.

Finance Management Grant (FMG)

Balance unspent at beginning of year	-	-
Current-year receipts	2 435 000	2 010 000
Conditions met - transferred to revenue	(2 435 000)	(2 010 000)
	-	-

The Financial Management Grant is paid by National Treasury to municipalities to assist the financial management reforms required by the Municipal Finance Management Act (MFMA), 2003. No funds have been withheld.

Municipal Systems Improvement Grant (MSIG)

Balance unspent at beginning of year	2 175	2 175
--------------------------------------	-------	-------

Conditions still to be met - remaining liabilities (see note 20).

The Municipal Systems Improvement Grant is allocated to municipalities to assist in building in-house capacity to perform their functions and to improve and stabilise municipal systems. No funds have been withheld.

Integrated National Electricity Programme (INEP)

Balance unspent at beginning of year	38	38
Current-year receipts	8 000 000	-
Conditions met - transferred to revenue	(8 000 000)	-
	38	38

Conditions still to be met - remaining liabilities (see note 20).

The grants was paid to the municipality to promote rural development and upgrade the electricity infrastructure.

50. Contingencies

Contingent Liabilities

Landfill sites

The Municipality currently have two active landfill sites. The Municipality reported that both are licensed for operation as required by the National Environmental Management Waste Act, 2008, (Act no 59 of 2008), but copies could not be provided as they were destroyed in a fire.

There is a new site under development at Hopetown, but is still in the process of being licensed and has not been used for disposal to date, therefore its rehabilitation provision will be added in the future. Currently it is not included in this year's assessment due to no obligation to rehabilitate yet.

In accordance with section 68(1) of the National Environmental Management Waste Act, 2008, (Act no 59 of 2008), a person convicted of an offence referred to in section 67(1)(a), (g) or (h) is liable to a fine not exceeding R10 000 000 or to imprisonment for a period not exceeding 10 year, or to both such fine and imprisonment, in addition to any other penalty or award that may be imposed or made.

Environmental Act -

In terms of the Environmental Act, the municipality is responsible for a number of environmental related transactions that may take place in its jurisdiction. This gives rise to contingent liabilities. However, the nature of such transactions cannot be estimated both financially and the number of occurrences, if any are to occur. Whilst the municipality is not aware of such liabilities, the following are the key transactions:

- contingent liabilities relating to fines that may be imposed by the department of environmental affairs as a result of illegal dumping by municipal employees.
- penalties relating to raw sewerage or sewerage not properly treated being released to nearby rivers or dams.
- penalties relating to lack of proper security at the municipality's dumping site or lack of monitoring waste being dumped there as some waste should be dumped in a certain specific way so as to avoid related health hazards e.g. medical waste.

Contingent assets

No contingent assets have been identified.

Errors

A number of accounts were re-stated in the comparative amounts of the financial statements due to prior period errors. Where applicable, the corrections and/or changes were adjusted retrospectively, unless otherwise stated.

The following prior period errors adjustments occurred:

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

Figures in Rand

2018

2017

52. Prior-year adjustments (continued)

Correction of error

Loans payable

A journal amount to R135 033 difference on the loans payable was not passed in the 2016 year of assessment, resulting in the loans payable note not agreeing to the DBSA statements received.

Incorrect interest journals were also passed during the 2017 year of assessment.

Resulting from the above, journals were passed to include the R134 284 previously excluded in the loans payable balance, and to reverse the incorrect interest journals passed. An additional journal was also passed to correct the current and the non-current portions of the line item, which had no net effect on the loans payable.

Third party collections

The 2017 balance for the third party collections was not updated for the 2017 transactions which took place. This resulted in the motor vehicle receipts on behalf of the third party and the payments to the third party being included in the Statement of Financial Performance.

A journal amounting to R621 990 was passed to correct this, whereby the motor vehicle transactions were reallocated to the third party collection vote, and the 12% commission per the statements from the third party was raised as income. The commission amounted to R36 678.

Employee related costs

For the 2017 year, the subsistence and travelling expenditure was moved to employee related costs for the Section 57 employees in order to be disclosed separately. As the subsistence and travelling allowances does not relate to these employees' remuneration packages, this was reversed and the subsistence and travelling were included in the general expenses with the other employees' travelling and subsistence payments. The adjustment amounted to R439 032.

Donations received

Donations received in 2016 were incorrectly included on the Statement of Financial Performance for the 2017 year. An adjustment of R2 288 770 was made to treat the amount as income received during the 2016 year.

Councillors remuneration

A UIF amount of R149 was included in the councillors remuneration for 2017, instead of the employee related costs. This was corrected in the comparatives for the 2018 year.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

Figures in Rand	2018	2017
-----------------	------	------

52. Prior-year adjustments (continued)

Bulk purchases

An amount of R500 000 was paid for bulk purchases, but only R400 000 was captured in error. This was corrected in the current year.

Leave accrual

A manual recalculation of the leave balances was performed, resulting in an adjustment to the leave balances for 2016 of R41 388, and an adjustment to the leave balances for 2017 of R597 956.

Other income

An insurance payout received in 2016 were incorrectly included on the Statement of Financial Performance for the 2017 year. An adjustment of R2 264 was made to treat the amount as income received during the 2016 year.

Other receivables

A settlement received in 2017 for a dispute amount of R167 700.88 was instead of being set off against the other receivable balance.

Property plant and equipment

Assets were identified by Market Demand, which were not recognised in the prior year. This amounted to an adjustment to cost of R20 521 and an adjustment to accumulated depreciation of R1 877. They also noted an asset where the cost price was incorrectly capture in 2017. This resulted to an adjustment to cost of R2 604 and an adjustment to accumulated depreciation of R360.

Change in accounting policy

No change in accounting policies occurred during the year under review.

[If retrospective application is impracticable for a particular prior period, disclose the circumstances that led to the existence of that condition and a description of how and from when the change in accounting policy has been applied.]

Reclassifications

Repairs and maintenance were reclassified according to the nature of the expenditure, in order to be in line with paragraph 104 of GRAP 1, which requires that an entity presents an analysis of expenditure either by nature or by function.

In the General Expenses note, the item named TVS in prior period financial statements have been renamed Speed Law Enforcement to improve understanding of what this line item relates to.

53. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

Thembelihle Local Municipality

(Registration number NC076)

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

Figures in Rand

53. Risk management (continued)

Liquidity risk

Ultimate responsibility for liquidity risk management rests with the council and the finance committee which has built an appropriate liquidity risk management framework for the management of the municipality's short, medium and long-term funding and liquidity management requirements. The municipality manages liquidity risks by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. The Municipality also gets funding from National and Provincial government which helps to ease the pressure of any liquidity crisis.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the policy. Trade Receivables are presented net of an allowance for impairment.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2018	2017
Receivables from exchange transactions	2 380 976	2 425 616
Receivables from non-exchange transactions	2 200 068	1 588 854
Other receivables	595 416	595 416

Market risk

Interest rate risk

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk. During 2018 and 2017, the municipality's borrowings at variable rate were denominated in the Rand.

Cash flow interest rate risk

Financial instrument	Current interest rate	Due in less than a year	Due in one to two years	Due in two to three years	Due in three to four years	Due after five years

54. Going concern

The draft annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality. The municipality currently relies on grants received from National and Provincial government.

The following matters have been considered relating to the going concern:

- Council approved the budget for the 2018/19 to 2020/21 budget. This three year Medium Term Revenue and Expenditure Framework (MTREF), which supports the ongoing delivery of municipal services to residents reflected that the budget, was backed over the three year period.
- The municipality's budget is subjected to a very rigorous independent assessment process to assess its cash backing status before it is ultimately approved by council.
- Strict daily cash management processes are embedded in the municipality's operations to manage and monitor all actual cash inflows and cash outflows in terms of the cashflow forecast supporting the budget. The cash management process is complemented by monthly reporting, highlighting the actual cash position, including associated risks and remedial actions to be instituted.
- As the municipality has power to levy fees, tariffs and charges, this will result in an ongoing inflow of revenue to support the ongoing delivery of municipal services.

55. Events after the reporting date

No events occurred after the reporting date.

Draft Annual Financial Statements for the year ended 30 June 2018

Notes to the Draft Annual Financial Statements

Figures in Rand

62. Distribution Losses - Water

Water

Water units available for sale (KI)	1 601 660	1 601 130
Water units sold (KI)	(608 517)	(582 940)
Water units lost (KI)	1 601 660	1 018 190
Average cost per unit R)	8	8
Total loss in Rand Value	7 458 505	8 206 612

Distribution losses relates to unaccounted water distributed. The foregoing costs, which represents 62% (2016: 64%) of the water purchases for the year, has been included in bulk purchases. The average cost per unit was R 7.51 (2016: R 8.06). The level of the distribution losses are not within the acceptable norms.

63. Distribution Losses - Electricity

Electricity

Electricity units bought (Kwh)	9 763 613	9 898 886
Electricity units sold (Kwh)	(6 578 200)	(6 869 110)
Electricity units lost (Kwh)	3 185 413	3 029 776
Highest Electricity Rate	2	2
Total loss in Rand Value	5 797 451	6 453 423

Distribution losses relates to unaccounted electricity distributions. This cost mainly arises from, inter alia, illegal connections to the electricity network and bridging of meters by consumers. The foregoing costs, which represented 33% (2016: 31%) of the electricity purchases for the year, has been included in bulk purchases. The highest rate was R 1.82 (2016: R 2.13). The level of the distribution losses are not within the acceptable norms.

64. Change in estimate

Property, plant and equipment

The useful life of certain items of property plant and equipment and intangible assets have been revised (Change in Estimate) as follow:

	<u>2017/18</u>	<u>2017/18</u>
<u>Other assets</u>		
Intangible assets	5 years	The Useful life of one of intangible assets was extended by 2 years

The effect of this estimate revision has been set out below for each class of asset and the depreciation:

Change in estimate

During the year the following changes were made to the estimations employed in the accounting for transactions, assets, liabilities, events and circumstances:

Change in depreciation resulting from reassessment of useful lives. The following categories are affected:

	Value derived using the original estimate	Value derived using amended estimate	R-value impact of change in estimate
Intangible assets	77 643	25 834	(51 809)

Appendix E(1)

June 2018

Actual versus Budget(Revenue and Expenditure) for the year ended 30 June 2018

	Forecast # 1 2018 Act. Bal.	Forecast # 1 2018 Adjusted budget Rand	Variance Rand	Var	Explanation of Significant Variances greater than 10% versus Budget
Revenue					
Property rates	4 103 051	7 573 178	(3 470 127)	(45.8)	When the Adjusted Budget was compiled most of the consumers had already paid there accounts in full for the whole financial year.
Service charges	21 188 579	29 052 923	(7 864 344)	(27.1)	The budget was compiled taking into account expected increases to be applied which did not materialise, this had an effect on the Electricity billed for the year that was not considered in the budget.
Rental of facilities and equipment	768 333	986 140	(217 807)	(22.1)	When the budget was compiled an expected increase was taken into account that did not materialised
Interest received (trading)	984 761	966 176	18 585	1.9	More debtors receipts were obtained which meant less interest charges.
Dividends received (trading)	-	-	-	-	
Fines, Licences and permits	1 100 800	961 211	139 589	14.5	The traffic fines which was expected to materialise only initiated the process at the end of the year therefore total year revenue could not materialise.
Government Grants	58 710 169	24 240 846	34 469 323	142.2	Grants received were less than expected due to RBIG and MIG projects only scheduled to start closer to the end of the financial year.
Commissions received	508 225	69 727	438 498	628.9	
Other income - (rollup)	1 800 153	780 900	1 019 253	130.5	Unexpected decrease in other services required, this decrease could not be estimated and taken into account at the time the budget was compiled.
Connection fees	62 109	52 679	9 430	17.9	
Interest received - investment	594 753	608 772	(14 019)	(2.3)	Larger investments were used as what was expected.
	89 820 933	65 292 552	24 528 381	37.6	
Expenses					
Personnel expenses	(26 784 243)	(26 426 273)	(357 970)	1.4	
Remuneration of councillors	(2 557 024)	(2 639 699)	82 675	(3.1)	
Administration	(60 591)	(110 119)	49 528	(45.0)	
Depreciation	(8 967 261)	(8 105 280)	(861 981)	10.6	The asset register was completely re-stated after the budget was done.
Amortisation	(62 800)	(127 320)	64 520	(50.7)	
Finance costs	(8 303 303)	(516 571)	(7 786 732)	507.4	Unexpected increase in the landfill site rehabilitation provision
Debt Impairment	(7 615 150)	(777 819)	(6 837 331)	879.0	More debt were collected than expected.
Lease rentals on operating lease	(699 687)	(818 880)	119 193	(14.6)	Budget was based on cashflow payments towards repairs & Maintenance. Actual's include creditors transactions.
Bulk purchases	(12 507 720)	(7 347 063)	(5 160 657)	70.2	Budget was based on cashflow payments towards repairs & Maintenance. Actual's include creditors transactions.
Contracted Services	(207 873)	(1 143 296)	935 423	(81.8)	Budget was based on contracts to start on January 2015, but only started in May 2015.
General Expenses	(24 495 145)	(14 038 442)	(10 456 703)	74.5	
	(92 260 797)	(62 050 762)	(30 210 035)	48.7	
Other revenue and costs					
Gain or loss on disposal of assets and liabilities	(269 173)	-	(269 173)	-	
Fair value adjustments	227 094	-	227 094	-	
	(42 079)	-	(42 079)	-	
Net surplus/ (deficit) for the year	(2 481 943)	3 241 790	(5 723 733)	(176.6)
